

Pneumatic glass bead gun P 84 ST

Item number:

KAM-P 84

Weight:

1.7 kg

Created on 24.12.2023

Description

Pneumatic bead gun Kamber Model 84 for road marking

Complies with European standards.

Swiss quality and manufacturing.

Piston Hard chrome plated Ø 12.0 N° 8305F

Air nozzle in the piston Ø x.x N° 8305

Material nozzle (Ø 4.0 to 10 mm) Ø x.x N° 8335

With filler neck for beads (clamp 6834) N° 8304-C

Diffuser adjustable N° 7515A is charged separately.

With documentation and tools.

Diffuser

The gun is equipped with an adjustable (orientation and width) diffuser to spread the glass beads equally over a wide line up to 30 cm. It has a stiffening plate in carbide to increase its lifetime. This can be easily replaced when it wears out.

The diffuser can be equipped with a glass bead sensor to avoid having a line without glass beads. This sensor is connected to an electronic device, which manages the gun(s) in action and the alarms (on request).

Description

Recommendation

- Block the suction tube when feeding by pressurized tank
- For air connection, use rather a Ø 8 mm hose
- Use an opening air pressure of 6 bar (87 psi)
