

# Pneumatic glass bead gun P 80 ST

Item number:

KAM-P 80 ST

Created on 24.12.2023

## Description

Pneumatic glass bead gun Kamber Model 80.  
Swiss quality & manufacturing. Complies with the valid European standards.  
Pistol body N° 7001  
Pistol head in stainless steel N° 7002  
Inlet for spillage (connection N° 2573 Optional)  
Set of needles and ducts separately, consisting of:  
Needle + material nozzle + air nozzle  
Exterior nozzle Karbid 2033 or stainless steel 2032 is charged separately.  
Gun with tool and scheme.

### Diffuser

The gun is equipped with an adjustable (orientation and width) diffuser to spread the glass beads equally over a wide line up to 30 cm. It has a stiffening plate in carbide to increase its lifetime. This can be easily replaced when it wears out.

The diffuser can be equipped with a glass bead sensor to avoid having a line without glass beads. This sensor is connected to an electronic device, which manages the gun(s) in action and the alarms (on request).

# Description

## Recommendations

- Block the suction tube when feeding by pressurized tank
- For air connection, use rather a Ø 8 mm hose
- Use an opening air pressure of 6 bar (87 psi)
