

Road Taper Plus - automatic Tape marking machine

Item number:

IBO-Road Taper Plus

Created on 24.12.2023

Description

Technology and service down to the last detail.

The deviations and inaccuracies in film laying, which are often caused by hand-held marking devices, are a thing of the past thanks to our Road Taper Plus. As currently the most accurate device for film laying on the market, our Road Taper Plus avoids complaints during the acceptance and the resulting rework - time and costs are saved.

Steering precision:

This easy-to-use but accurate direct steering assists the driver to keep the laying direction accurate, even at high speeds.

Knife Control:

The cutting process is carried out automatically or by manual command and via an air-controlled cylinder to the control unit - absolute precision knives made of specially hardened industrial steel provide up to 1 million times for real precision work.

Contact pressure:

Up to 8 bar pressure force ensure firm adhesion of the marking film. Applied without distortion and tension, remain inaccurate width.
