

# Glass beads spreader

Item number:  
CMC-GBS 550

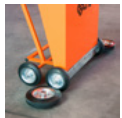

Length:  
56 cm

Width:  
68 cm

Height:  
93 cm

Weight:  
36 kg

Created on 23.12.2023

## Description

Glass beads spreader for the surface application of reflex glass beads on protective paths, retaining beams, etc.

The amount of applied reflex glass beads can be easily adjusted via the wheels attached to the beads spreader.

Thanks to its special design, glass beads can be safely and easily applied both with a towed and pushed car.

The sophisticated design of the glass bead spreader reduces the self-extinguishing of glass beads to a minimum.

The ideal tool for the application of cold sprays plastic material.

To applicate protective paths and retaining beams with an ideal amount of reactive glass beads.

Working width: 53 cm

Quantity glassbeads with small wheel  $\varnothing$  160 mm: approx. 320 g/m<sup>2</sup>

Quantity glassbeads with big wheel  $\varnothing$  200 mm: approx. 250 g/m<sup>2</sup>
