* maximum lifting load according to Dir. 2007/30/CEE

The **LIFTOP** is the universal **VALIFTER** solution, born from the needs of workers to move the manhole covers in safety.

Made with special **aluminum alloys**, with folding handle, lightweight and adjustable, it is the **only manhole cover opener in the world with the ergonomics certification**.

Thanks to **LIFTOP**, the operator maintains an upright posture during lifting, eliminating the **risk of musculoskeletal trauma**, reducing the minimum effort.

The opening of a manhole cover could seem an easy operation, but in reality it involves a series of technical and operational aspects, safety risks and extra consumption of time: **LIFTOP**, thanks to the **hybrid set-up**, allows a single worker to handle all types of manhole covers quickly and safely.
