

Foil laying device

Item number:

KOE-TA-150

Created on 20.04.2024

Description

The TA150 film laying device is an inexpensive, lightweight film laying device without a cutting device. Cutting must be done by hand with a cutter knife.

The TA150 is suitable for small installations of road marking film for traffic safety. The marking can be carried out quickly, conveniently and easily.

The TA150 fits into any combination vehicle and can be carried and used directly by one person.
