

Motorized foil laying device

Item number:

KOE-MFVG

Created on 20.04.2024

Description

The motorized laying device for laying films for road and roadworks markings. It is compact and easy to use.

- No need for heavy physical labor.
- is equipped with a 6.5 HP Honda industrial engine. For longer laying distances, even on steep gradients
- Can be switched from motorized to manual operation.
- Can be transported in small site vehicles.
- Has a built-in maneuvering mode that enables easy approach to the pre-marking.
- Is equipped with a manual cutting device. This is operated with the foot during laying.
- During installation, the operator can decide at any point where to cut the film.
- The MFVG effortlessly masters highly adhesive films that require considerable force with a manual device.
- No lengthy instruction during operation. Nothing needs to be programmed. Handling is self-explanatory.
- It is a stable, solid and robust device with high quality.
