

WA-MK 400 - Adapter for magnetic lid lifter

Item number:
AND-1362

Width:
30 cm

Height:
120 cm

Weight:
6.3 kg

Created on 01.11.2025

Description

The WA-MK400 is an adapter with wheels that was developed for use with the MK400. It converts the MK400 into a lifting trolley. It makes it easier to lift and move manhole covers with minimal physical effort on the part of the user.

Thanks to the lever-based operation, the handle only needs to be pressed down to lift the cover. This takes the strain off the back and allows the user to move the cover safely and with minimal effort. The flexible design of the fastening system enables quick and easy assembly and disassembly of the adapter.

Large solid rubber wheels make it easier to move the lid even on uneven surfaces.

Weight: 6.3 kg
Height: 120 cm

- Quick and easy assembly on MK400
- All metal parts made of stainless steel
- Large solid rubber wheels Ø 200 mm
- Rubberized handles
