

stromport.b1 - Bicycle stand bracket with power - galvanized/powder-coated with mounting shoe

Item number:
Stromp2.e

Length:
85 cm

Width:
14 cm

Height:
90 cm

Weight:
44 kg

Created on 24.05.2026

Description

The bike holder with charging function.

The stromport.b1 is an innovative bike rack that stores bikes securely and saves space, ideal for urban environments. It offers easy installation with a stable foundation and has an integrated Schuko socket for charging electric bikes. With its modern design, the stromport.b1 blends harmoniously into various environments and supports sustainable mobility for municipalities and companies.

Future-proof and sustainable

Important features and functions:

- Bicycle leaning bracket for two bicycles
- Lockable, weather-protected storage of the power supply unit brought along
- Optionally available with integrated power supply unit
- Modern and aesthetic design
- Compact design
- Available in different colors

Technical specifications stromport.b1
